DOCSIS 3.0 32x8 channel bonding
Full capture bandwidth
Supports IPv4 and IPv6

ALWAYS-ON, HIGH-PERFORMANCE INTERNET CONNECTION

The CDA3-35 is the perfect choice for cable operators who want to offer high-speed broadband access to their customer base economically. It delivers speeds of up to 1.2Gbps (32x8) with thirty-two bonded downstream channels over its DOCSIS interface. The CDA3-35 allows MSOs to offer their customers various broadband applications such as telecommuting, HD and UHD video on demand over IP connectivity to small office/home office (SOHO), high-speed residential Internet access, interactive multimedia services, etc. The CDA3-35 is an intelligent device that enhances its basic data transmission features with IPv6 support. This makes it especially suitable for the transmission of data based on this protocol.

RAPID, SIMPLE DEPLOYMENT, MONITORING AND MANAGEMENT

Installation of the CDA3-35 is quick, straight-forward, and can even be carried out by the end-user. Once connected, the built-in TFTP client automatically gets the IP address and configuration data from the network server without human intervention. A browser-based utility allows convenient viewing of key network statistics, and SNMP support provides total remote control over the device.
